*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

Each of the TOPS Portfolios seeks a competitive return for its investment style. The TOPS Portfolios are collective investment funds that will invest primarily in Exchange Traded Funds representing multiple asset classes, including large cap value equities, large cap growth equities, mid cap value equities, mid cap growth equities, small cap value equities, small cap growth equities, large cap international equities, emerging markets equities, real estate, natural resources, intermediate corporate bonds, short term bonds, government bonds, high yield bonds and cash. Mutual fund investments may be made within the Portfolios where appropriate.

Portfolio Construction

The TOPS Conservative Portfolio seeks to preserve capital and provide moderate income and capital appreciation by investing primarily in exchange-traded funds ("ETFs"), and other index-based vehicles, that invest in corporate and government fixed income securities, common and preferred stocks, real estate, and natural resources securities. The TOPS Conservative Portfolio places a greater emphasis on fixed income investments than equity and real estate investments. The TOPS Conservative Portfolio may be appropriate for investors with intermediate-term investment time horizons who are seeking capital preservation as well as the opportunity for income and growth. Although the Fund is constructed in a manner intended to reduce volatility, the investment holdings are still subject to investment risk and loss of investment value.

Expense Relative to Peer Group

Peer Group (5-95%): Separate Accounts/CITs - U.S. - Allocation--15% to 30% Equity

Disclosures

Maintained by: TD Ameritrade Trust Company

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value. Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund summary documents, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a summary document for the fund(s) being offered.

Fund shares of U.S. Government Securities Fund are not guaranteed by the U.S. government.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the fund summary documents. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. While not directly correlated to changes in interest rates, the values of inflation-linked bonds generally fluctuate in response to changes in real interest rates and may experience greater losses than other debt securities with similar durations.

TOPS Strategic Allocation Portfolios consist of fully discretionary, fee-paying, Collective Investment Funds (CIF). Returns shown are total returns and include any respective dividends in the calculation. All return information is on a before-tax basis.

The portfolios are globally diversified portfolios with a combination of equity and fixed income target allocations as outlined on the website listed above and will not normally deviate from these targets. Equity and fixed income allocations will drift throughout the year as capital markets change in value resulting in higher or lower exposures than stated by the target. The returns listed do not contain any material conditions, objectives or investment strategies other than those disclosed below.

Collective trusts are available exclusively to qualified retirement plans. They are the functional and operational equivalent of mutual funds. Collective Funds are exempt from SEC registration under federal securities laws and accordingly this disclosure does not contain information which would otherwise be included if registration were required. Collective funds are regulated by the Office of the Comptroller of the Currency (OCC) and the Department of Labor (DOL) through ERISA.

Benchmarks: The S&P 500, MSCI EAFE and Barclay's U.S. Aggregate Bond Index indices are unmanaged groups of widely held common stocks and bonds covering a variety of industries. They include reinvested dividends. One cannot invest directly in an index. The S&P 500, MSCI EAFE and Barclay's Aggregate Bond Index are shown for comparative purposes. The S&P 500 Index is a commonly used benchmark comprised of all the stocks in the S&P 500 weighted by market value, a conservative growth portfolio. The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US & Canada. The Barclay's U.S. Aggregate Bond Index is a universally accepted benchmark for bond performance and is comprised of bonds with a maturity over one year. One cannot invest directly into an index.

Index returns are for illustrative purposes only and do not represent Portfolio performance. Each Index listed may have varying degrees of volatility. Index volatility is represented by Beta. Beta measures a security's price volatility compared to the overall market. A Beta of 1 moves in line with the market; Beta less than 1 moves less than the market and a Beta greater than 1 moves more than the market. Beta figures are for the trailing 60-month period, compared against the S&P 500 on a monthly basis. The 3-month, YTD, 1-Year, 3-year, 5-year and 10-year and since inception trailing average returns are geometric means of the monthly returns for the respective years and are annualized. Please consider the investment objectives, risks, charges and expenses of any investment options before investing.

Fund Information: The Strategic Allocation Portfolios maintained by TD Ameritrade Trust Company are collective investment funds and invest in strategies developed by Valmark Advisers, Inc

About the Sub-Advisor: Valmark Advisers, Inc. is a registered investment advisory firm and part of the Valmark family of companies which has over 40 years of focused experience in providing estate planning, wealth management and investment management services to retail and institutional investors. For more information, go to www.TOPSPortfolios.com.

Fees: There are no sales commissions or redemption fees charged for purchases and sales of interest in the Funds. Total Trustee Fee: TD Ameritrade, The Trustee, charges an annual fee of 0.06% for Class I shares (0.03% paid to TD Ameritrade and 0.03% paid to Valmark Advisers – see Sub-Advisory Fee) of total assets held in each fund. TD Ameritrade, The Trustee, charges an annual fee of 0.03% for Class II shares (0.03% paid to TD Ameritrade and 0.00% paid to Valmark Advisers – see Sub-Advisory fee) of total assets held in each fund. The fee accrues on a daily basis and is payable monthly in arrears. The Trustee's fee is charged directly to the particular Fund. Sub-Advisory Fee: A portion of the Trust Fee, 0.03% for Class I and 0.00% for Class II (as noted in the Total Trustee Fee) will be paid to Valmark Advisers, Inc. for services provide to the Trustee. Weighted Average Expense of Underlying Funds: The Fund will invest in Exchange-Traded Funds and Collective Investment Trusts that charge asset management fees of 0.06%, based on the strategy deployed per annum. The Management Fee is an additional cost incurred by and deducted from the daily Net Asset Value of the underlying Exchange-Traded Funds.

Terms & Definitions:

Standard Deviation: a measure used to quantify the amount of variation or dispersion of a set of data values. A low standard deviation indicates that the data points tend to be close to the mean (also called the expected value) of the set, while a high standard deviation indicates that the data points are spread out over a wider range of values.

Downside Deviation: a measure used to quantify the amount of variation or dispersion of a set of data values that fall below a reference benchmark.

Alpha: gauges the performance of an investment against a market index or benchmark which is considered to represent the market's movement as a whole.

R2: statistical measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index.

Sharpe Ratio: average return earned in excess of the risk-free rate per unit of volatility or total risk.

Tracking Error: divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.
